PROFILE

A Computer Science student with a strong academic track record, including achieving a 4.00 CGPA twice. Enthusiastic about web development, with hands-on experience in building full-stack systems and familiarity with frameworks such as Laravel and React.js. Currently developing a Learning Management System (LMS) for a tuition centre as part of an ongoing project.

Highly motivated to apply my technical skills to real-world challenges and continuously grow as a web developer. I'm always open and eager to learn new technologies or programming languages if the team needs me to pick up something new, I'm more than ready and excited to take on the challenge.

Possess strong soft skills such as effective communication, teamwork, and problem-solving. Known for being responsible and dependable often finishing tasks before the deadline.

WORK EXPERIENCE
